3M™ Scotchmate™ Reclosable Fasteners

Fabric consisting of hundreds of hooks or loops that mate together with light finger pressure and pull apart by hand for thousands of closures.

[\[click to enlarge\]](#)

Additional Information

These fasteners can provide quick and easy attachment where repeated openings and closings are required such as: medical braces and devices, apparel, helmet padding, and other temporary holding applications. Scotchmate reclosable fasteners are available in a plain backed version for sewing, adhesive backed for a quick stick, or a backing designed for ultrasonic welding.

Make a Selection

Acrylic Adhesive

These hook and loop fasteners are coated on the back side with a high temperature acrylic pressure sensitive adhesive designed to function over a range of temperatures and humidity.

Flame Resistant Adhesive

Hook and loop fasteners which provide flame resistance when tested per FAR 25.853 and other common flammability tests.

Plainback (No Adhesive)

Hook and loop fasteners offering thousands of openings and closings with no adhesive on the back. Temperature resistant to 250 degrees F

Synthetic Rubber Adhesive

Hook and loop fastener with a tacky rubber based adhesive on the back.

Thin Reclosable Fasteners

Thin reclosable fasteners with limited number of openings and closings.
