Work Safety

Fire Barrier Products

Fire barrier composite sheets are a one-part fire resistive sheet made of 1/4-inch composite material. A layer of 28 AWG galvanized steel is bonded to one side and the other is reinforced with hexagonal shaped steel-wire mesh covered with aluminum foil. It seals larger penetrations through fire rated walls and floors.

Work Safety

Fire Barrier Products

The Fire Stop block is ready-to-use, intumescent flexible block based on a two-component polyurethane foam. It is completely free from dust and fibers, halogen, asbestos and solvent free and operational immediately after installation. The block can be painted.

The foam filler Stop-N-Seal CF 116 is a reusable polyurethane filler foam system which is perfect for "stop and go" applications. CF 116 refill pack contains (3) 12 oz. cans, (1) CF-GR grip dispenser and (3) CF-GA nozzles supplied in cardboard kit. The reusable system allows user to dispense contents of can after several hours, days or even weeks. High yield provides over 50% more foam per can than most competitive foams. A unique grip dispenser allows comfort and increased control of application over traditional straw foams.

Cable Ties

Cable Ties and Accessories

PREMIER's cable ties are constructed of heavy-duty nylon which assures optimum field performance. Plenum cable ties are also available to comply with fire codes. PREMIER cable ties are produced in a variety of colors to comply with the Electronic Industries Association (EIA) color coding standard, which defines colors used in identification of electronic components and establishes a standard color-number relationship. PREMIER cable ties are manufactured to meet industry standards and comply with Underwriters Laboratories specifications where applicable.

- Minimum tensile unlocking strength - up to 250 lbs.
- Operating temperature - up to 185°F (85°C)
- Available in a variety of colors to comply with EIA color coding standard
- Available in a variety of lengths - 4-inch to 32-inch
- Premier offers an orange pouch with an assortment of striped cable ties
- UL listed
- Made in the U.S.A.

Encapsulants

Re-Enterable Encapsulant

3M Telecom's encapsulant is a non-urethane, re-enterable encapsulant that is fully compatible with all types of filled cable. It absorbs cable filling materials yet remains re-enterable. No cleaning of filled cable is required. Used for encapsulating buried splice closures.
