Scissors

Klein's electrician's Scissors upper blade has notches for stripping 19 and 23 gauge wire. It is designed for telecom and electrical applications and heavy-duty use. It is made out of strong tough tempered steel. The nickel-plated finish resists corrosion. The scraper and file are on the outside of both blades. The screw hinge permits adjustment and the serrated lower blade reduces slippage.

Fusion Splicer

Fusion Splicer

Corning Cable System's OptiSplice™ Premier iLID fusion splicer comes with an FBC-006 cleaver, heavy duty carrying case with handles and wheels, heat-shrink oven, detachable splice tray holder, USB work lamp, AC power supply with US power cord, three 12V rechargeable batteries, one-year limited warranty, one-year remote service plan, operator's manual and maintenance tool kit. The iLID-OSM-T-H is the most popular configuration.

- For single mode, specialty single mode (NZDS, DS, LS, Er) and multimode fiber (50µ and 62.5µm)
- Direct core Alignment LID-system Unit, 3-axis alignment
- Built-in full functioning PC - 1GHz Processor, 256MB RAM, 20GB hard drive, built-in speaker, Windows XP operating system, 10/100 Ethernet, color VGA monitor
- Graphic User Interface for easy menu navigation
- Remote service capabilities via the Internet with integrated GPS system
- On-board interactive training videos
- Factory and user defined programs for all common fiber types
- Heat-shrink oven, 60 second process

S177A Fiber Fusion Splicer

Fiber Fusion Splicer

The new hand-held FITEL S177A incorporates an improved heating design that cuts splice-to-heat time by 40 percent, achieving a 9-second splice time and 37-second heat time. The unit's T-shaped body design is also 40 percent lighter, weighing only 4.85 pounds including battery. Ideal for fast field use, the S177A reduces the fiber length required for splicing by 30 percent. In addition, fiber magnification power is 608X, marking the industry's most powerful rating for a core alignment splicer.

- Faster splicing
- Multiple splicing programs
- Built-in battery
- Transreflective LCD
- Large data memory capacity
- Machine self-check
- Simply enter the maintenance menu and select the procedure you wish to perform and the unit will provide step-by-step instruction with images

Fitel, a Furukawa Product

Item No.	Mfg. Part No	Description
0000186120	S177A-01-KIT	Splicer Fusion F/O Handheld Core-Alignment

S122 Fiber Fusion Splicer

Fiber Fusion Splicer

With its super low profile and new user interface, the fusion splicer offers next generation workability for every splicing field, FTTX, LAN, backbone, or long-haul installations. Combining the portability, power flexibility and field ruggedness of FITEL's previous generation of hand-held splicers with the proven quality and performance of our ribbon splicers, the S122 delivers fast and consistent splicing with outstanding mobility and extreme ease-of-use.

- Superb mobility and workability
- Rugged body
- New GUI & LCD screen
- Multi-window fiber display
- Fast and accurate
- Enhanced ease of use

S122M12 Fiber Fusion Splicer

Fiber Fusion Splicer

Fitel's S122M12 represents the industry's first hand-held ribbon fusion splicer. The ultra compact unit allows for easy usage in even the most restricted locations where ribbon splicing has previously not been possible. The unit incorporates several new technologies which allow for skill-free operation whether splicing single fiber or up to 12-ribbon fiber. New technologies include the patented Real Time Arc Control System which greatly improves the splice consistency and reduces splice loss. In addition, this feature virtually eliminates the need to traditional arc checks.

Another innovation is FITEL's Fiber Clamp Vibration System. This feature automatically positions each fiber in the correct v-groove channel for easy operation. This unit is ideal for aerial splicing, nodes and pedestals, as well as traditional large count trunk splicing. The unit can be operated via traditional work bench, worktable, tripod, hand-held, or around the operator's neck. The S122M12 represents the best-in-industry for field ruggedness, manufactured with die-cast metal and incorporating corner pad protection.

- Superb mobility and workability
- Rugged body
- Real Time Arc Control
- Fiber Clamp Vibration System
- Automatic fiber count identification
- New GUI & LCS screen

Connector Termination Add-On-Kit

Connector Termination Add-On Kit

FITEL's new connector termination system allows for unsurpassed performance and flexibility in the field. This new "splice-on" connector eliminates the need for field polishing and significantly improves the quality of the termination and installation time required. FITEL's factory polished ferrules with pre-cleaved fiber stubs are spliced onto the field fiber utilizing FITEL's proprietary ferrule holder and fusion splicer. Once spliced, the SC/APC or SC/UPC connector is easily assembled by using a process that requires minimal skill or training.

- Simple, fast, & consistent field termination
- No polishing or epoxy
- Fiber Management
- Allows for easy field repair of pre-terminated splitters, fan outs, and drop terminals

Little Buddy

Fish Tape

The Little Buddy® is ideal for handling a wide variety of jobs. At 3/16" outside diameter, this fish tape is only slightly larger than the Wee Buddy. Yet it's available in lengths from 150 to 300 feet, making it ideal for those tasks that might be a bit much for a smaller fish tape to handle, jobs like running inside and outside conduit drops. It's also ideal for home drops from the hand-hole box to the house or building. Some technicians even find it handy on light pole and control wiring, or walker ducts. This lightweight, portable unit operates vertically or horizontally, allowing for a great deal of versatility and offers a drag brake to control payout. It also comes standard with our accessory repair kit.

Jameson

7426150418	742615	10-316-300	Fish Tape 300 Ft. Little Buddy 3/16-Inch Outside Diameter

Big Buddy

Fish Tape

Heavy Duty. That's really the only way to describe the Big Buddy.® Designed to rod or fish conduit of 4" inside diameter or larger and available in lengths of 500 to 1000 Feet, the Big Buddy is perfect for those big-time jobs. Like manhole-to-manhole work. Or long-run cable pulls. But we haven't sacrificed flexibility for muscle. Big Buddy is fully portable, storing easily inside small vans. And it operates either vertically or horizontally for maximum versatility. Its rod can also be marked and offers a drag brake.
